WHAT'S NEW IN 2023

Improvements to the user interface make the software more efficient to use. Better management of filters, verification tools and default typing.

**Boost your productivity** with dedicated configuration wizards for standard components and new multi-edit commands.

Take your designs to the next level with all the new features of TopSolid'Wood 2023.

TopSolid
INTEGRATED DIGITAL FACTORY
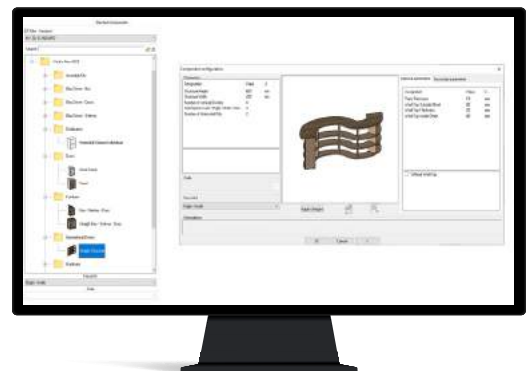

DISCOVER WHAT'S NEW

USABILITY

- Improved software ergonomics for daily time saving.
- Improved relevance when filtering in the Wood features.
- Tool for fast verification of production information (tool numbers/priorities/machining phases).
- Part pre-typing in the preliminary design phase to simplify the selections.
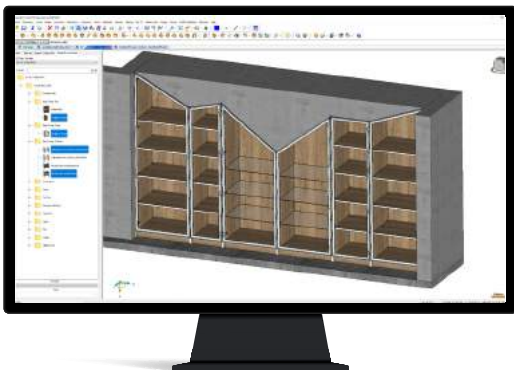

INCREASED PRODUCTIVITY

- Access and configure your standard components directly from the Design tree.
- Using user libraries has never been easier.

INCREASED AUTOMATION

- Serialization principles open up new perspectives for faster custom design.
- Extrusions, curved shapes and the inclusion of components now benefit from serial operation principles.

DO MORE, BETTER AND FASTER

- Better management of the layout of distributed volumes.
- New operations available for woodWOP export.
- Simplified interchangeability on assembly kits.
- Over 50 other improvements available now to help you get the most out of TopSolid'Wood.
